	9" x 12"	
	8" x 10"	
	6" x 8"	N/A

The EASyL models, Versa & Pro meet the demands of even the most professional plein air artists. The Versa has a large palette size of up to 12"x16" while the Pro is 11"x14" . Both EASyL models boast an all-in-one design includes palette, storage spaces for supplies and wet panels, all in a single unit. The easel and palette box are made from beech and are coated with a clear lacquer finish for protection while maintaining the beauty of the woodgrain. All metal parts are solid brass, and fasteners are of stainless steel. Every metallic component on the EASyL is rust proof.

The EASyL is ideal for artists who paint in plein air using either oil or watercolor. The detachable grid separator on the VERSA (sold separately) is made especially for pastel artists who want to utilize the space as their palette and storage space.

Innovative control knobs and side hinges allow the easel to be easily adjusted to any angle, and the two way pan-head allows for changing the tilt and height. The EASyL, with its ease of use and exceptional craftsmanship, is rapidly becoming the number one choice for plein air artists.

Contents:

- 1 - Collapsible easel and palette combination box.
- 1 - Stainless steel, gold flash brush washer.
- 2 - Solid brass hooks for brush washer or water container.
- 1 - Shoulder strap and handle.
- 1 - Professional tripod with 2-way pan head.
- 1 - Nylon carrying bag for tripod.

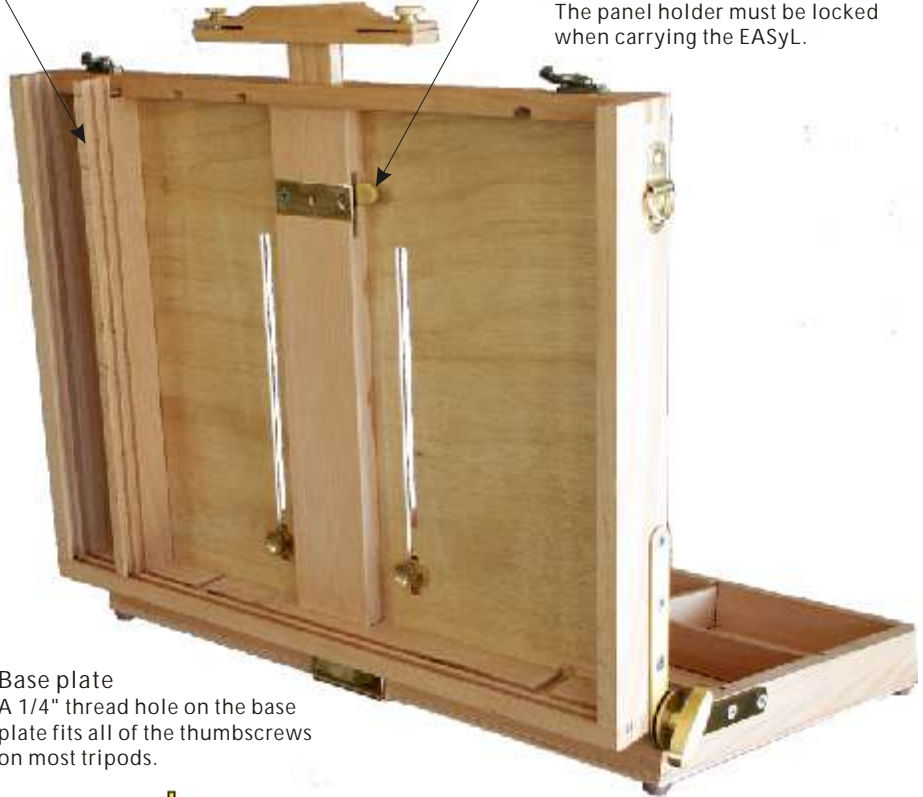

Patented

Install the bar in different slots for different panel sizes.

Panel holder snap lock
Lock the panel holder by pushing the snap lock upward. Push down to unlock. The panel holder must be locked when carrying the EASyL.

Push lower part of bar until it releases.

Base plate
A 1/4" thread hole on the base plate fits all of the thumbscrews on most tripods.

The easel box is mounted on a tripod.

Pull and remove the bar from the slot.

To re-install the bar, insert the bar in the slot at the other end of the easel back, and reverse the procedure above.

Professional Tripod

The tripod supplied with the EASyL easel is a lightweight, heavy duty professional grade tripod. It has been specially designed for plein air painting purposes. The maximum loading capacity is 12 lbs, more than enough to carry the easel box, canvas, and brush washer etc.

The tripod is supplied with a quick release plate for quick and easy mounting and dismounting of the easel box. A spare quick release plate and a hex key are also included. The hex key is for adjusting the quick snap locks on the legs.

The maximum overall height is 53". The 2-way panhead has a built-in bubble level to aid horizontal adjustment of the easel box. The three tripod legs can be adjusted individually to three positions. The first position is for normal use, the second position has a wider leg span which is more stable under windy conditions. The third position can be applied for extreme low pose use. The lowest height is 18". The length of the tripod is 23" when collapsed.

The three legs can be adjusted individually to enable the artist to achieve a stable platform even on the most uneven ground. This is very important, for example, when an artist paints on a rocky hill or by the seaside.
